***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over LaBate et al in view of Soofi et al. LaBate et al teaches an apparatus for lining a tundish (a metallurgical vessel) including a strut and brace structure (figures 2 and 3 for example) covered by a plurality of panels (33) which overlap showing all aspects of the above claims except the provision that the struts and braces be made adjustable in the manner recited in the above claims. Soofi et al teaches a frame for a lining apparatus for lining a tundish which includes a plurality of struts and a plurality of braces which are adjustable through the use of an adjustable connector including pins allowing for adjustability of both the struts and braces (see the embodiment of figure 4 for example), where the adjustability provided by this arrangement allows for the use of the same frame for the lining of many different sizes of vessels thereby increasing the usefulness of the lining apparatus (see col. 2 lines 10-20 for example). Because improved usefulness would also be desirable in the lining apparatus shown by LaBate et al, motivation to construct the frame of LaBate et al through the use of adjustable struts and braces in the manner shown by Soofi et al, in order to allow the apparatus to be used and re-used to line different sizes and shapes of vessels, would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.

***Response to Arguments***

Applicant's arguments filed on 4/16/2007 have been fully considered but they are not persuasive. Applicant's argument that Labate does not teach movable struts and braces, and that Soofi, while teaching adjustable struts and braces does not teach adjustable panels mounted on movable struts and braces is not persuasive because the rejection is based upon a combination of these two references in which the combination results in the claimed invention. One cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). In the instant case, as expressed in the above rejection, mounting of the plates of Labate upon the adjustable braces and struts of Soofi in order to achieve the greater versatility allowed by the use of adjustable struts and braces, results in an obvious combination of adjustable walls upon a frame of movable struts and braces.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1793

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
